12th August 2021

Audley Square Redevelopment – Erection of Tower Crane 1 (New Dates)

Dear Neighbour,

We have had to postpone the Tower Crane 1 (TC1) erection to the weekend of 21st August 2021. This will entail erecting TC1 on Saturday, 21st August from 8:00am to 6:00pm and carrying out necessary tests and checks on Sunday, 22nd August from 9:00am to 6:00pm.

Due to the size and nature of the crane parts and the method of the erection, TC1 will be erected over the weekend, as directed by the Met Police's movement orders for 'abnormal loads.'

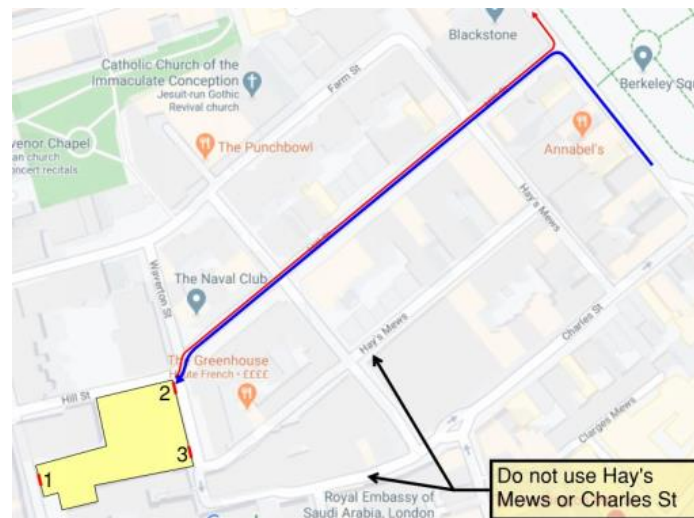

The mobile crane that will be used to erect TC1 will arrive and be driven onto site before 8:00am and the engine turned off, as per Met Police Movement Orders. However, no works will start until after 8:00am. The TC1 components will arrive on multiple delivery trucks (one at a time) throughout the day after 8:00am.

The erection works will consist of lifting activities and bolt fixing, none of which are considered noisy activities. Our traffic marshals will be on hand to ensure public safety during this activity. We will not be required to close any of the surrounding roads.

TC1 will assist us in carrying out our Bulk Excavation works and Superstructure construction. We will also be installing a second Tower Crane (TC2) in September 2021 (more details to follow). For more details on our Bulk Excavation works, please refer to our Public Exhibition and Neighbour Liaison Meeting presentations at www.audleysquareredevelopmentmayfair.com.

For all deliveries during this weekend, the delivery route will be approaching from Berkeley Square along Hill Street to the site entrance on Waverton Street. Please refer to the diagram below for additional details:

Our Project Manager, Mike Bassett, will be on site during the crane installation and will be on-hand for any questions or concerns during the installation. His phone number is 07718 572090.

With kind regards,
Alahna Dunbar
Neighbour Liaison Manager
